Sir

Subject - Grant for the sinking of a bore-well in Malur Town

I have the honour to state that the town of Malur is at present being served with water from two wells sunk in the bed of the Malur Doddakere tank which has been reserved for this purpose since over 15 years past. The yield of water in these wells is adequate to meet the requirements of the town only when there is plenty of water in the tank and falls short of requirements when there is insufficient supply in the tank owing to failure of rains. The difficulty in regard to water is of frequent recurrence. Besides the atchkatdars of the tank have been repeatedly protesting against the continued reservation of the tank for water supply to the town to the detriment of their interests. The Executive Engineer, Kolar, has also brought to notice that this continued reservation has adversely affected - irrigation of lands below the tank which have been lying fallow - resulting in loss to Government by way of assessment. The reservation of the tank for water supply to the town has been sanctioned only up to the end of the current year in G O No P W 1016-20/S dated 16-8-41, with the observation that the Municipality should make their own - arrangements for water supply within the period. This means that the Municipality cannot continue to depend upon the tank any longer for water supply.

Having regard to these difficulties, it has been thought - desirable to have recourse to some other source of water supply to the town and release the tank water for purposes of irrigation in

In this view, the idea of putting down one or two borewells in a suitable locality was suggested to the Municipal Council by my predecessor, Mr G Sundara Rao during his inspection of the Municipality on 19-3-1941

The suggestion was taken up in right earnest by the Municipal Council and as a result of correspondence on the subject, with the Sanitary Engineer an estimate for Rs 1300/- for putting down an experimental borewell has been received from that officer. The Municipal Council have sanctioned the estimate at their meetings held on 5-7-1941 and 31-7-1941, and have resolved that a sum of Rs 1000/- provided under 'DI Public Works' in their current year's budget may be paid towards the cost, the balance of Rs 300/- being met by Government as a grant to the Municipality from "Water supply Grants" for the current year.

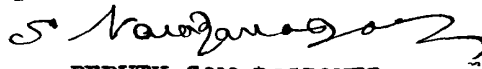

It is reported by the Sanitary Engineer, that the present estimate for Rs 1300/- is only for sinking a borewell 150 feet deep and does not include the cost of machinery required for lifting the water therefrom. The Sanitary Engineer, states that the cost of the machinery will be intimated after the well work is completed.

In view of the urgency of the situation as explained above, the President of the Municipality has been permitted to place the Municipal quota of Rs 1000/- at the disposal of the Sanitary Engineer who has been requested to take up the work immediately. I therefore request that Government may be kindly moved to sanction a grant of Rs 300/- being the balance of the estimated cost, to the Palur Municipality from out of the "Water Supply Grants" during the current year. This item has been included in the consolidated statement of water supply grants recommended for this District in my letter No A 5 P R 59/41-42 dated 1-9-1941.

The favour of early orders is solicited.

Copies of the resolutions of the subject passed by the Municipal Council at their meetings referred to above together with a copy of this office Memo of even number dated 20-8-1941 are enclosed herein for favour of reference.

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY COMMISSIONER,
POLAR DISTRICT
